

BiSL Foundation

Business Information Services Library (BiSL)

Business processes and IT

Within the complexity of today's market, businesses simply cannot do without properly functioning information technology (IT). As such, IT is an important aid for the implementation of any business strategy. The most critical points are found in the alignment of IT with business processes. It is precisely this alignment that is often far from optimum. Business information administrators and information managers bear final responsibility for this alignment.

BiSL

In order to provide support to organizations in the improvement of their business information management, a public domain process model is available: the Business Information Services Library (BiSL). BiSL describes the primary processes of a business information management function at the strategy, management and operations level.

BiSL establishes a bridge between IT and business processes, and between business information administrators and information managers. The BiSL process model provides an insight into all of the primary processes within their field of operations and into the relationship between the various processes. It offers a starting point for the improvement of these processes using best practices, amongst other things, and it provides uniform terminology.

BiSL Foundation

The exam for the Foundation Certificate in Business Information Management (BiSL Foundation) tests the theoretical basic knowledge of BiSL. Passing the BiSL Foundation exam means you have knowledge and insight in:

- the structure of the BiSL framework and the importance of a framework like BiSL for the realization of information management/business information management
- organization strategy and information strategy
- the difference between business information management, application management and technical infrastructure management
- the relationship between business information management and the business processes and the user organization

Target group

The exam Business Information Management Foundation is intended for people who have an operational, managing or strategic role with regard to IT services and are situated on the demand side of information provisioning in an organization. Or they are closely associated with the information provisioning of the organization. This exam is therefore relevant to both non-IT staff and IT staff that are responsible for the information provisioning in an organization. Examples of these roles are: Business information manager, Business systems administrator, Super user, Information-architect, Chief Information Officer, Service Manager, Information Manager and the Business Unit Manager (who is responsible for organizing business information management).

Training providers

EXIN accredits organizations and training providers in order to ensure the quality of the training or education programs they provide. For anyone attending a training course, accreditation guarantees that they receive professional guidance and supervision in preparation for the independent exam. EXIN accreditation offers significant competitive advantage to individual players within the IT training sector.

EXIN is an independent examination institution; therefore EXIN does not give courses itself and is not attached to any training provider. This ensures that the examination results are judged objectively. No matter where students have taken their courses, the exam is the same for all and marking is fair and professional. Please consult our website for an overview of Accredited Training Providers worldwide.

Quality assured

EXIN is a global, independent and not-for-profit IT examination provider. It's EXIN's mission to improve the quality of the IT sector, the IT professionals and the IT users, by means of independent testing and certification. Earning an independent certificate represents solid evidence of your successful completion of the course requirements. It illustrates your dedication to becoming more competent and valuable to your organization and the customers you serve.

Exams all over the world

EXIN's popular and highly successful examinations are accessible to candidates at a time and place of their choice because the reach of EXIN is global: In addition to EXIN International based in the Netherlands, EXIN has regional offices all over the world. EXIN's international reach is further strengthened by strategic partnerships with international agents and authorized examination centers.
